

TRIANGLE FRATERNITY

*A Fraternity For
Engineers, Architects, &
Scientists*

Est. 1907

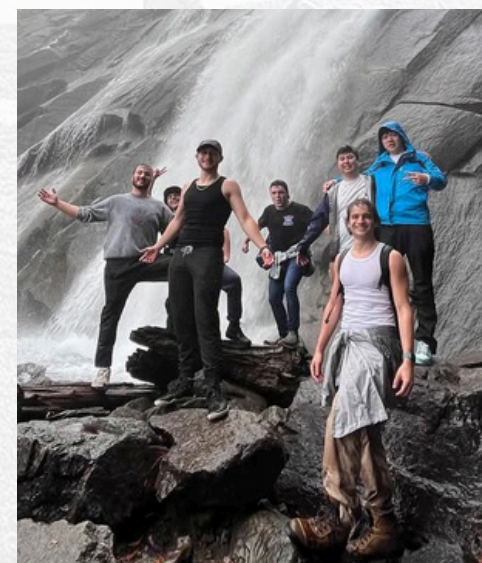

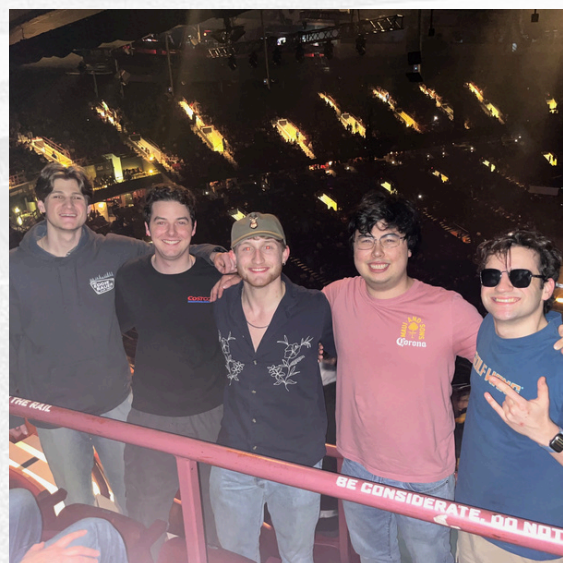

BROTHERHOOD

The mission of Triangle is to maintain a fraternity for engineers, architects, and scientists. We strive to develop balanced men, cultivate high moral character, foster lifelong friendships, and lead lives of integrity.

We take great pride in our commitment to this mission and in developing a strong sense of Brotherhood. To accomplish this goal, we have three pillars of success:

Social Professional Academic

ALL COS

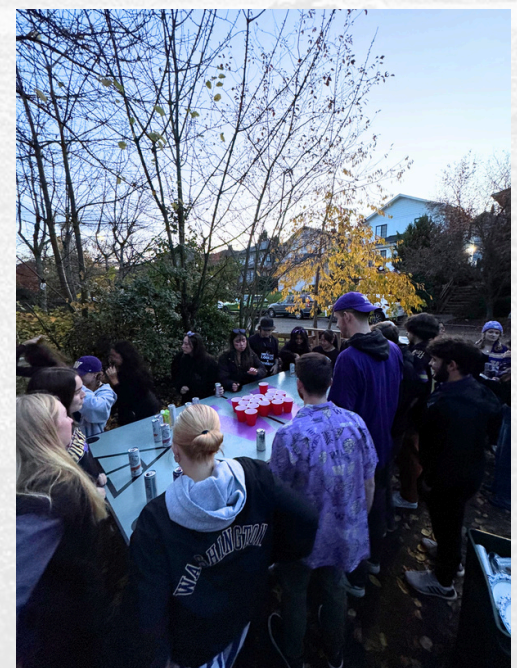

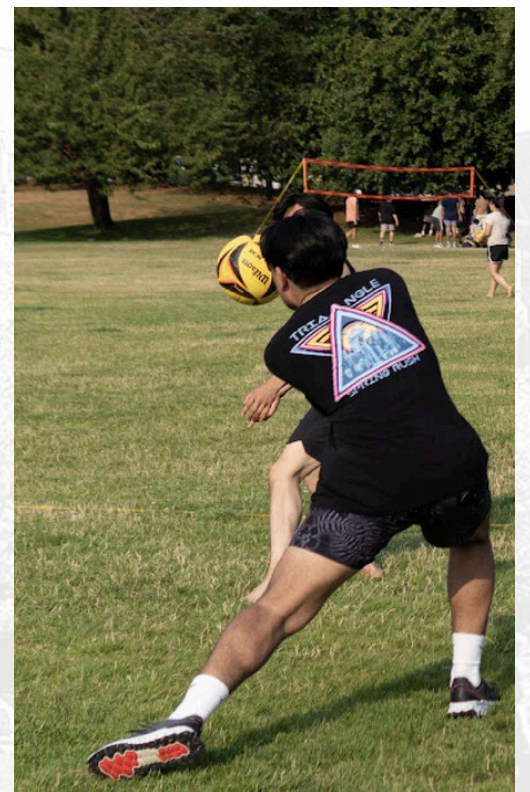

When you join Triangle, you become part of a network of like-minded men. With such rigorous course loads, we strive to provide numerous opportunities to relax and recharge from coursework.

We host casual events weekly, including Die tournaments, poker nights, house BBQs, and game nights.

Triangle works with other RSOs and sororities to host mixers, philanthropy fundraisers, and major public events.

We participate in intramural leagues and HUB bowling teams.

Our young and growing chapter has countless opportunities to gain leadership and event planning experience!

PROFESSIONAL

With 39 chapters across 25 states, Triangle boasts a network of over 30,000 alumni worldwide working in all STEM disciplines.

Notable alumni include:

- ***Fredrick Kappel (former AT&T chairman)***
- ***Steven L. Miller (former Shell Oil CEO)***
- ***Michael Morhaime (Co-founder and President of Blizzard Entertainment)***

Through leadership opportunities, networking events, resume workshops, interview prep, and advising, Brothers are better positioned to receive internships, co-ops, and full-time offers after graduation.

This past summer, over 50% of our members received an internship offer or summer research position.

After graduation, Brothers work at some of the largest companies nationwide including:

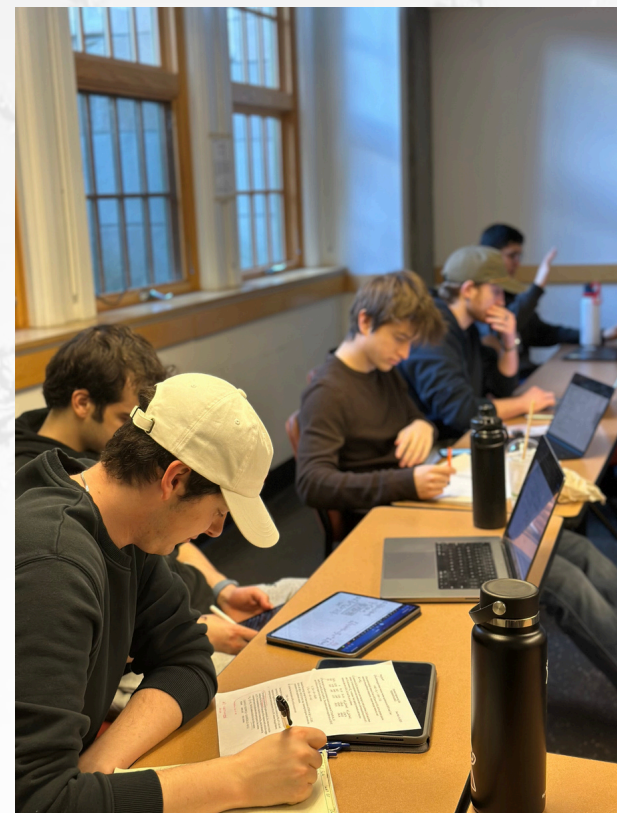

- ***Amazon***
- ***Google***
- ***Boeing***
- ***Microsoft***
- ***Phillips***
- ***Deloitte***

ACADEMICS

From computer science to engineering, pre-med to architecture, our chapter hosts a diverse community of STEM majors.

Our chapter is home to members at every stage of their STEM career! From grad school applicants to those applying into their major, we provide support throughout your academic journey.

Triangle reserves large study spaces and hosts weekly study sessions for Brothers.

Brothers have access to a large library of textbooks, school supplies, lab equipment, and other required class materials.

We provide academic and major/grad school application advising in addition to study programs.
